

5 HTML TRICKS NOBODY TELLS

O Lazy Loading image

Lazy loading prevent the loading of images that aren't really needed on the screen immediately as you scroll down or closer to the image, the image begins to load.

```
1 
```

1 Input Suggestions

Use this input hack to get useful and relevant suggestions when you are trying to search for something really helpful.

```
1 <label for="country">Choose your country from the list:</label>
2 <input list="countries" name="country" id="country">
3 <datalist id="countries">
4     <option value="India">
5     <option value="Germany">
6     <option value="USA">
7     <option value="Japan">
8 </datalist>
9
```

2

Document refresher

This will redirect the user to the provided URL that is “**https://google.com**” in 4 seconds and then Set to 0. For an immediate redirect.

```
1 <meta http-equiv="refresh" content="4"; URL='https://google.com' />
```

3

Picture Tag

using the `<picture>` tag which allows you to add multiple images fitting different widths instead of having a single one scale up & down.

```
1 <picture>
2     <source media="(min-width:768px)" srcset="medium.jpg">
3     <source media="(min-width:495px)" srcset="small.jpg">
4     
5 </picture>
```

4

Base URL

This tag comes in handy when you have a lot of anchor tags redirecting to a certain URL and all the URL's start with the same address.

```
1 <head>
2   <base href="https://www.twitter.com/" target="_blank">
3 </head>
4 <body>
5   <a href="ElonMusk">ElonMusk</a>
6 </body>
```
